

Enterprise Property, Leasing & Asset Management Platform

Business Requirements Document (BRD)

Document Version: 1.0

Document Type: Business Requirements Document

Project Type: Enterprise Real Estate Management Platform

Primary Domains

Property Management | Asset Management | Leasing | CRM | Collections | Maintenance | Portfolio
Analytics | Digital Marketing Integration | Website Integration | Executive Reporting

1. Executive Overview

The objective of this project is to design and implement a centralized, enterprise-grade real estate platform that manages the complete lifecycle of properties, buildings, units, tenants, leasing activities, contracts, collections, maintenance, portfolio performance, asset valuation, marketing activities, and executive reporting.

The platform shall serve as the organization's primary real estate operating system and act as the single source of truth for all property, leasing, operational, commercial, and financial information.

The system must support residential, commercial, office, retail, warehouse, mixed-use, land, compound, and other real estate asset classes.

The platform must be designed for long-term scalability and must support future integration with external platforms, government systems, financial systems, digital marketing channels, business intelligence platforms, and automation tools.

2. Strategic Objectives

1. Centralize all property and unit information.
2. Centralize tenant and customer information.
3. Manage the complete leasing lifecycle.
4. Monitor unit availability in real time.
5. Reduce vacancy periods.
6. Increase portfolio occupancy.
7. Improve collection rates.
8. Monitor receivables and overdue amounts.
9. Manage maintenance costs.
10. Monitor operating expenses.
11. Measure property profitability.
12. Calculate NOI at property and portfolio level.
13. Monitor asset values.
14. Compare property performance across cities and districts.
15. Generate executive management reports automatically.
16. Reduce reliance on spreadsheets.
17. Integrate property availability with the corporate website.
18. Integrate digital marketing platforms.
19. Integrate external CRM, ERP, accounting, and workflow systems.
20. Support future integration with Ejar and other government systems where APIs and authorization are available.
21. Enable data-driven management decisions.
22. Provide complete auditability.
23. Support future AI and predictive analytics capabilities.

3. Core Design Principles

3.1 Single Source of Truth

The system shall be the authoritative source for:

- Properties
- Buildings
- Units
- Availability
- Pricing

- Customers
- Leads
- Tenants
- Contracts
- Payments
- Collections
- Maintenance
- Property expenses
- Portfolio valuation
- Leasing performance
- Marketing attribution
- Management reporting

No duplicate master databases shall be maintained within the website or other connected platforms.

3.2 Real-Time Data Architecture

Updates to unit status, availability, pricing, reservation status, lease status, payment status, collection status, vacancy status, maintenance status, and property performance shall be reflected across connected modules and dashboards immediately or near real time.

3.3 Drill-Down Architecture

Portfolio → Region → City → District → Property / Project → Building → Floor → Unit → Tenant / Contract / Payment / Maintenance

Users must be able to move from executive-level portfolio indicators to transaction-level details without leaving the platform.

3.4 API-First Architecture

- REST APIs
- JSON
- OAuth 2.0
- API Keys where appropriate
- JWT
- Webhooks
- API Versioning
- Rate Limiting

3.5 Configurable Business Rules

- Approval thresholds
- Discount authority
- Reservation validity
- Renewal notice periods
- SLA thresholds
- Escalation rules
- Workflow stages
- Property types
- Unit types
- Custom fields
- Publishing rules
- Notification rules
- KPI thresholds

4. Property Hierarchy

Level 1	Portfolio
Level 2	Region
Level 3	City
Level 4	District
Level 5	Property / Project
Level 6	Building
Level 7	Floor
Level 8	Unit

The hierarchy must remain flexible. Not every property must use every hierarchy level.

5. Supported Property Types

- Residential Apartments
- Villas
- Residential Compounds
- Residential Buildings
- Commercial Buildings
- Office Buildings
- Offices
- Retail Shops
- Showrooms
- Warehouses
- Logistics Assets
- Mixed-Use Projects
- Shopping Centers
- Land
- Kiosks
- ATM Sites
- Advertising Spaces
- Telecommunications Sites
- Storage Areas
- Parking Assets
- Staff Accommodation
- Hospitality-related Assets
- Other Configurable Asset Types

Administrators must be able to add additional asset types without software development.

6. Property Master Record

Every property shall have a unique Property ID.

6.1 Identification

- Property ID
- Property Code
- Property Name - English
- Property Name - Arabic

- Property Type
- Property Usage
- Property Status
- Portfolio
- Region
- City
- District
- Address
- National Address
- Latitude
- Longitude
- Google Maps Reference
- Cost Center
- Property Manager
- Leasing Manager
- Asset Manager
- Acquisition Date
- Operational Start Date

7. Ownership Information

- Ownership Document Type
- Ownership Document Number
- Ownership Document Date
- Issuing Authority
- Ownership Document Attachment
- Owner Type
- Individual / Entity
- Owner Name
- Identification Type
- Identification Number
- Commercial Registration Number
- Ownership Percentage
- Authorized Representative
- Ownership Notes

8. Ejar-Aligned Property Data

The platform shall maintain a configurable data structure that supports fields commonly required for Ejar property and unit registration, including where applicable:

- Ownership Documentation
- Owner Information
- Property Type
- Property Usage
- National Address
- Building Information
- Number of Floors
- Number of Units
- Facilities
- Unit Details

- Lessor Information
- Tenant Information
- Contract Financial Terms
- Contract Period
- Payment Frequency
- Additional Contract Terms

Internal company-specific fields shall be maintained separately without compromising external data compatibility.

9. Property Technical Information

- Land Area
- Built-Up Area
- Gross Leasable Area
- Net Leasable Area
- Common Area
- Parking Area
- Number of Buildings
- Number of Floors
- Number of Units
- Construction Year
- Renovation Year
- Property Condition
- Parking Capacity
- Number of Elevators
- HVAC Type
- Electrical Capacity
- Water Infrastructure
- Fire Fighting System
- Fire Alarm System
- Generator
- Building Management System
- CCTV
- Access Control
- Loading Facilities
- Emergency Systems

10. Unit Master Record

Each unit shall have a permanent and unique Unit ID.

- Unit ID
- Unit Code
- Property
- Building
- Floor
- Unit Number
- Unit Type
- Usage Type
- Unit Status
- Gross Area

- Net Area
- Leasable Area
- Terrace Area
- Balcony Area
- Storage Area
- Parking Allocation
- Number of Rooms
- Number of Bedrooms
- Number of Bathrooms
- Kitchen
- Maid Room
- Driver Room
- Furnishing Status
- HVAC Type
- Electrical Meter Number
- Water Meter Number
- Electricity Account
- Water Account
- Unit Condition
- Unit Availability Date

11. Commercial Unit Information

- Frontage
- Ceiling Height
- Electrical Load
- Permitted Activities
- Signage Rights
- Loading Access
- Delivery Access
- Parking Allocation
- Shell and Core Status
- Semi-Fitted Status
- Fully Fitted Status
- Furnished Status
- Fire System
- HVAC Capacity
- Utility Capacity
- Fit-Out Requirements

12. Property and Unit Documents

- Images
- Videos
- Floor Plans
- PDF Documents
- CAD Drawings
- Brochures
- 360 Tours
- Virtual Tours

- Ownership Documents
- Licenses
- Certificates
- Contracts
- Insurance
- Valuation Reports
- Maintenance Documents

Files shall support Version, Upload Date, Uploaded By, Expiry Date, File Category, and Access Permissions.

13. Unit Status Management

- Available
- Available Soon
- Under Negotiation
- Reserved
- Pending Approval
- Contract Preparation
- Leased
- Occupied
- Notice Received
- Under Maintenance
- Under Renovation
- Blocked
- Off Market
- Reservation Expired

Statuses shall be configurable.

14. Availability Engine

Availability must not depend only on manual status selection. The platform shall calculate unit availability based on current contract, contract expiry date, tenant notice, expected vacate date, reservation, reservation expiry, unit maintenance, unit preparation period, renovation period, and administrative blocking.

The system shall calculate Available From Date.

15. Rent Roll

The platform shall maintain a complete Rent Roll at Unit, Building, Property, District, City, and Portfolio level.

- Tenant
- Unit
- Area
- Contract Start Date
- Contract End Date
- Annual Rent
- Rent per Square Meter
- Service Charge
- Deposit
- Payment Frequency
- Amount Billed
- Amount Collected

- Outstanding Amount
- Overdue Amount
- Next Payment Date
- Contract Status

16. Pricing Engine

- Asking Rent
- Target Rent
- Minimum Rent
- Approved Rent
- Market Rent
- Current Contract Rent
- Previous Rent
- Rent per Square Meter
- Monthly Rent
- Annual Rent
- Service Charges
- Deposit
- Utilities
- Parking Charges
- Other Charges
- VAT
- Discounts
- Incentives
- Rent-Free Period
- Fit-Out Contribution

17. Price History

All pricing changes must be retained. Each price change shall record Previous Value, New Value, Effective Date, User, Reason, Approval Reference, Supporting Document, and Market Reference. Previous prices must never be overwritten without history.

18. Pricing Approval Workflow

Pricing approvals shall be configurable. Example: discount up to 5% - Leasing Manager; 5% to 10% - Leasing Director; above 10% - Executive Approval.

- Asking Price
- Requested Price
- Discount Amount
- Discount Percentage
- Annual Impact
- Contract Term
- Total Contract Value
- Customer
- Property
- Unit
- Justification

Approval options: Approve, Reject, Return for Modification.

19. Leasing CRM

**New Lead → Contact Attempted → Contacted → Qualified → Viewing Scheduled → Viewing Completed
→ Negotiation → Proposal Issued → Pending Approval → Approved → Reserved → Contract
Preparation → Contract Issued → Contract Signed → Won / Lost**

20. Lead Record

- Lead ID
- Customer
- Mobile Number
- Email
- Company
- Requested Property
- Requested Unit
- Unit Type
- Required Area
- Budget
- Move-In Date
- Source
- Campaign
- Date Created
- Assigned Employee
- Status
- Qualification
- Next Action
- Next Follow-Up Date

21. Customer 360

- Personal Information
- Company Information
- Mobile
- Email
- Identification
- Commercial Registration
- All Leads
- All Requested Units
- Property Interests
- Viewings
- Proposals
- Reservations
- Contracts
- Payments
- Communication History
- WhatsApp Conversations
- Email Conversations
- Notes
- Activities
- Documents

- Complaints
- Tasks
- Next Action

22. Duplicate Prevention

The platform shall detect duplicate customers based on Mobile Number, Email Address, National ID, Iqama, and Commercial Registration. If an existing customer is found, the new request shall be linked to the existing customer profile.

23. Lead Sources

- Corporate Website
- Google
- Google Ads
- Instagram
- Facebook
- Snapchat
- TikTok
- LinkedIn
- WhatsApp
- Call Center
- Walk-In
- Referral
- Broker
- Property Portal
- Aqar
- Bayut
- Property Finder
- Campaign
- Employee Referral
- Other

24. Lead Distribution

- Manual Assignment
- Round Robin
- Property-Based Assignment
- City-Based Assignment
- Lead Source-Based Assignment
- Team-Based Assignment
- Workload-Based Assignment

25. Lead SLA

The system shall monitor response times and support escalation rules. Example: a new lead must be contacted within 15 minutes; after 15 minutes notify the employee; after 30 minutes escalate to the manager.

- Average First Response Time
- SLA Compliance
- Uncontacted Leads
- Escalated Leads

26. Follow-Up Management

No qualified or active lead should remain without a Next Action.

- Follow-Up Date
- Follow-Up Time
- Reminder
- Call
- WhatsApp
- Email
- Meeting
- Viewing
- Task

27. Communication Management

The system shall record calls, WhatsApp, email, meetings, viewings, notes, follow-ups, and tasks. Each activity shall record User, Date, Time, Activity Type, Outcome, Notes, Next Action, and Follow-Up Date.

28. Viewing Management

- Viewing Scheduling
- Employee Assignment
- Customer Confirmation
- Property
- Unit
- Meeting Point
- Date
- Time
- Status

Statuses: Scheduled, Confirmed, Completed, Cancelled, No Show, Rescheduled.

29. Viewing Feedback

- Customer Interest Level
- Price Suitability
- Area Suitability
- Location Suitability
- Unit Suitability
- Likelihood to Lease
- Customer Comments
- Leasing Agent Comments
- Next Action

30. Alternative Unit Matching

If the requested unit is unavailable, the platform shall recommend alternatives based on Property, District, City, Unit Type, Required Area, Price Range, Usage, and Availability Date.

31. Leasing Proposal Management

The platform shall generate professional branded leasing proposals containing:

- Customer
- Property
- Unit
- Area
- Rent per Square Meter
- Annual Rent
- VAT
- Service Charges
- Deposit
- Contract Duration
- Payment Terms
- Escalation
- Grace Period
- Fit-Out Period
- Parking
- Utilities
- Special Terms

32. Proposal Version Control

Each modified proposal must create a new version. Previous versions must be retained.

33. Reservation Management

- Reservation ID
- Customer
- Property
- Unit
- Reservation Date
- Expiry Date
- Reservation Amount
- Payment Status
- Reservation Terms
- Approval Status

Upon reservation, unit status shall automatically change to Reserved.

34. Reservation Expiry

When a reservation expires without contract completion, Reservation Status shall become Expired and Unit Status shall become Available, subject to configured business rules. The website and connected listing channels shall update automatically.

35. Double Booking Prevention

The system must prevent multiple active reservations for the same unit, overlapping lease contracts, and conflicting occupancy periods. Database-level transaction controls shall be used.

36. Rental Application

36.1 Individual

- Full Name

- Identification
- Nationality
- Mobile
- Email
- Employer
- Income
- Supporting Documents

36.2 Corporate

- Company Name
- Commercial Registration
- Unified Number
- VAT Number
- Authorized Representative
- Business Activity
- Contact Details
- Supporting Documents

37. Contract Management

- Contract ID
- Contract Number
- Ejar Reference
- Tenant
- Lessor
- Property
- Building
- Unit
- Contract Start
- Contract End
- Duration
- Annual Rent
- Payment Frequency
- Deposit
- VAT
- Service Charges
- Escalation
- Grace Period
- Special Conditions
- Contract Status

38. Ejar Integration Readiness

The platform shall be designed for future integration with Ejar subject to API availability, authorization, regulatory requirements, and technical access.

- Ejar Contract Number
- Ejar Contract Status
- Submission Date
- Authentication Status
- Last Sync Date

- Error Message
- External Reference
- Integration Log

39. Compliance Rules Engine

The system shall support configurable regulatory rules based on City, Property Type, Unit Type, Contract Type, Contract Date, Tenant Type, and Regulatory Authority. Rules shall not be permanently embedded in source code.

40. Payment Schedule

The system shall generate payment schedules based on contract terms. Supported frequencies: Monthly, Quarterly, Semi-Annual, Annual, and Custom.

- Invoice Date
- Due Date
- Amount
- Paid Amount
- Balance
- Status

41. Payment Status

- Upcoming
- Due
- Paid
- Partially Paid
- Overdue
- Cancelled
- Waived

42. Collections Management

Collections shall be a core module. For every contract and unit, the system shall calculate Contract Value, Amount Billed, Amount Due, Amount Collected, Outstanding Amount, Overdue Amount, and Collection Percentage.

43. Unit-Level Collection

- Annual Rent
- Contract Value
- Amount Collected YTD
- Amount Collected LTD
- Outstanding Amount
- Overdue Amount
- Collection Rate
- Next Payment Date
- Last Payment Date
- Payment History

44. Property-Level Collection

- Total Contracted Revenue
- Total Billed
- Total Collected
- Total Outstanding
- Total Overdue
- Collection Rate
- Aging Analysis

45. City and Portfolio Collections

The same collection KPIs must roll up automatically to District, City, Region, and Portfolio. The user shall be able to drill down to the contributing property, contract, and unit.

46. Aging Analysis

- Current
- 1-30 Days
- 31-60 Days
- 61-90 Days
- 91-180 Days
- 180+ Days

47. Collection Workflow

Reminder → Collection Follow-Up → Escalation → Formal Notice → Legal Review

The complete history shall be retained.

48. Tenant Ledger

- Opening Balance
- Invoices
- Payments
- Credit Notes
- Adjustments
- Outstanding
- Overdue
- Deposit
- Current Balance

49. Payment Reconciliation

- Invoice Matching
- Payment Matching
- Partial Matching
- Unmatched Payments
- Reconciliation History

50. Maintenance Management

- Preventive Maintenance

- Corrective Maintenance
- Emergency Maintenance
- Inspection
- Renovation
- Unit Turnaround

51. Maintenance Work Order

- Work Order ID
- Property
- Building
- Unit
- Asset
- Tenant
- Category
- Priority
- Description
- Assigned Vendor
- Assigned Employee
- Response SLA
- Resolution SLA
- Cost
- Status
- Created Date
- Completed Date

52. Maintenance Costs

Maintenance costs shall be recorded and aggregated at Unit, Building, Property, City, and Portfolio levels.

- Maintenance Budget
- Actual Maintenance Cost
- Preventive Cost
- Corrective Cost
- Emergency Cost
- Vendor Cost
- Cost per Square Meter
- Cost per Unit

53. Maintenance SLA

- Target Response Time
- Actual Response Time
- Target Resolution Time
- Actual Resolution Time
- SLA Compliance
- SLA Breach

54. Preventive Maintenance

- HVAC
- Elevators

- Fire Systems
- Pumps
- Generators
- Electrical Systems
- Plumbing
- CCTV
- Access Control
- Other Assets

55. Asset Register

The platform should support operational equipment registration such as Elevators, Chillers, Generators, Pumps, and Fire Panels.

- Asset ID
- Asset Code
- Property
- Building
- Location
- Purchase Date
- Warranty
- Supplier
- Maintenance Schedule
- Maintenance History
- Lifetime Maintenance Cost

56. Operating Expenses

- Maintenance
- Security
- Cleaning
- Utilities
- Landscaping
- Facility Management
- Insurance
- Property Management
- Municipality Charges
- Common Area Expenses
- Other OPEX

57. Property Profitability

The platform shall calculate Gross Rental Income minus Vacancy Loss minus Operating Expenses = Net Operating Income (NOI).

- NOI Margin
- Revenue per Square Meter
- OPEX per Square Meter
- Maintenance Cost per Square Meter

58. Asset Valuation

- Acquisition Cost
- Book Value
- Latest Market Value
- Valuation Date
- Valuation Company
- Valuation Method
- Previous Valuation
- Change in Value
- Land Value
- Building Value
- Supporting Valuation Report

59. Portfolio Value

The system shall calculate total portfolio value based on approved valuation records and make the value available by Portfolio, Region, City, District, Property Type, Usage, and Property.

The system must distinguish between Market Value, Book Value, Acquisition Cost, Annual Rental Value, and Contracted Rental Revenue.

60. Yield and Capitalization Metrics

- Gross Yield
- Net Yield
- Capitalization Rate
- NOI Yield

Calculation formulas shall be centrally defined in the KPI Dictionary.

61. Portfolio-Level Executive Dashboard

- Total Portfolio Market Value
- Total Book Value
- Total Properties
- Total Buildings
- Total Units
- Total GLA
- Annual Rental Value
- Contracted Revenue
- Billed Revenue
- Collected Revenue
- Collection Rate
- Outstanding
- Overdue
- Occupancy
- Vacancy
- Vacant GLA
- NOI
- OPEX
- Maintenance Cost

- Expiring Contracts
- Renewal Exposure
- Vacancy Loss

62. Dashboard Hierarchy

24. Executive Portfolio Dashboard
25. Region Dashboard
26. City Dashboard
27. District Dashboard
28. Property Dashboard
29. Building Dashboard
30. Unit Dashboard
31. Leasing Dashboard
32. Collection Dashboard
33. Maintenance Dashboard
34. Asset Performance Dashboard
35. Marketing Dashboard
36. Contracts and Renewal Dashboard

63. Property Dashboard

63.1 Property Overview

- Property Value
- Total Units
- Total GLA
- Occupied Units
- Vacant Units
- Occupancy Rate
- Vacant GLA
- Annual Rental Value

63.2 Financial Performance

- Contracted Revenue
- Billed Revenue
- Collected Revenue
- Outstanding
- Overdue
- Collection Rate
- NOI
- OPEX
- Maintenance Cost
- Yield

63.3 Operational Performance

- Open Maintenance Orders
- Closed Work Orders
- Maintenance Cost
- Average Resolution Time
- Vacant Units

- Available Soon
- Reserved Units
- Units Under Maintenance

64. Unit Dashboard

- Unit Details
- Tenant
- Current Contract
- Contract Value
- Current Rent
- Rent per Square Meter
- Collected Amount
- Outstanding Amount
- Overdue Amount
- Payment Schedule
- Lease History
- Previous Tenants
- Vacancy History
- Price History
- Maintenance History
- Total Maintenance Cost
- Documents

65. Building Dashboard

If a property contains multiple buildings, users shall be able to compare buildings based on Occupancy, Vacancy, Revenue, Collections, Maintenance, NOI, and Rent per Square Meter.

66. City and District Dashboards

- Number of Properties
- Number of Units
- Portfolio Value
- Annual Rental Value
- Contracted Revenue
- Collected Revenue
- Occupancy
- Vacancy
- Average Rent per Square Meter
- Maintenance Cost
- OPEX
- NOI
- Yield

67. Dashboard Visualization Standards

- KPI Cards
- Bar Charts
- Line Charts
- Area Charts

- Donut Charts
- Waterfall Charts
- Heat Maps
- Trend Indicators
- Maps
- Occupancy Gauges
- Collection Gauges
- Variance Indicators

Dashboards must prioritize visual clarity and executive usability.

68. Geographic Portfolio Map

A geographic dashboard shall display property locations. Users shall be able to view performance geographically by City, District, and Property. Map indicators may represent Asset Value, Revenue, Number of Units, Occupancy, or Collection Performance.

69. Drill-Down Reporting

Portfolio KPI → City → District → Property → Contract → Unit → Payment Transaction

This principle shall apply across all major KPIs.

70. Property Comparison

- Occupancy
- Vacancy
- Rent per Square Meter
- Collection Rate
- NOI
- Maintenance Cost
- Yield
- Vacancy Days
- Revenue Growth

71. Property Ranking

- Best Performing
- Lowest Performing
- Highest Occupancy
- Lowest Occupancy
- Highest Collection
- Lowest Collection
- Highest NOI
- Highest Maintenance Cost
- Highest Vacancy
- Longest Vacancy
- Highest Revenue Growth

72. Budget Versus Actual

- Revenue Budget
- Collection Budget

- OPEX Budget
- Maintenance Budget
- NOI Budget
- Actual
- Variance
- Variance Percentage

73. Period Comparison

- Month-on-Month
- Quarter-on-Quarter
- Year-on-Year
- Custom Period Comparison

74. Executive Exceptions

- Units vacant more than defined threshold
- Collection below threshold
- Maintenance above budget
- Contracts expiring within defined period
- High outstanding receivables
- High tenant concentration
- High operating cost
- Low NOI

75. KPI Thresholds

Authorized administrators shall define Green, Amber, and Red thresholds for major KPIs.

76. Vacancy Management

- Vacant Units
- Vacant Area
- Vacancy Percentage
- Days Vacant
- Expected Availability
- Vacancy Loss
- Long-Vacant Units

77. Days on Market

- Vacancy Start Date
- First Publish Date
- Listing Date
- Lease Signed Date

The system shall calculate Days on Market.

78. Vacancy Loss

The system shall calculate estimated rental loss generated by vacancy and aggregate it to property and portfolio level.

79. Occupancy Metrics

- Physical Occupancy
- Economic Occupancy
- Unit Occupancy
- Area Occupancy
- Leased Occupancy

80. Lease Expiry Profile

- 30 Days
- 60 Days
- 90 Days
- 180 Days
- 12 Months
- Custom Period

The dashboard shall also display the rental value associated with expiring contracts.

81. WALE

For commercial assets, the system should support Weighted Average Lease Expiry (WALE) at Property and Portfolio levels.

82. Tenant Concentration

- Top Tenants by Revenue
- Tenant Share of Portfolio Revenue
- Tenant Concentration
- Industry Concentration
- Property Concentration

83. Renewal Management

Renewal workflows shall begin before contract expiry based on configurable periods such as 180, 120, 90, 60, and 30 days.

84. Renewal Dashboard

- Contracts to Renew
- Renewal Discussions
- Renewal Offers
- Renewed Contracts
- Non-Renewals
- Renewal Rate
- Rent Increase on Renewal
- Rent Decrease on Renewal

85. Notice and Move-Out

- Notice Date
- Expected Vacate Date
- Reason

- Move-Out Status

The unit may automatically change to Available Soon according to publishing rules.

86. Handover Management

- Contract Signed
- Payment Received
- Deposit Received
- Unit Ready
- Keys
- Access Cards
- Parking
- Meter Readings
- Unit Photos
- Tenant Signature
- Company Signature

87. Digital Handover Form

- Property
- Unit
- Tenant
- Meter Readings
- Keys
- Access Cards
- Condition
- Notes
- Images
- Signatures

88. Website Integration

The corporate website shall receive property and unit information directly from the platform.

- Property Publication
- Unit Publication
- Pricing
- Availability
- Unit Status
- Images
- Floor Plans
- Property Description
- Amenities
- Available From Date

89. Website Publishing Controls

- Publish Property
- Publish Unit
- Publish Price
- Hide Price

- Contact for Price
- Publish Availability
- Publish Exact Unit Number
- Featured Property
- Featured Unit
- Available Soon

90. Website Search

- City
- District
- Property Type
- Unit Type
- Usage
- Area Range
- Price Range
- Number of Bedrooms
- Parking
- Furnishing
- Available Now
- Available From Date

91. Website Lead Capture

When a visitor submits Request Information, Request Viewing, Request Leasing, WhatsApp Request, or Contact Request, the system shall automatically create or update a lead.

92. Website Lead Data

- Customer Name
- Mobile
- Email
- Property
- Unit
- Source
- Date
- Landing Page
- Device
- UTM Source
- UTM Medium
- UTM Campaign
- UTM Content
- UTM Term

93. Digital Marketing Integration Hub

The platform shall include a dedicated Digital Marketing Integration Hub capable of connecting directly through available official APIs to:

- Snapchat Ads
- TikTok Ads
- LinkedIn Ads

- Meta Ads
- Instagram
- Facebook
- Google Ads
- Google Analytics
- Google Tag Manager
- YouTube
- X Ads where required
- Other future marketing platforms

94. Direct Lead Form Integration

Where APIs permit, the platform shall receive leads directly from TikTok Lead Generation Forms, LinkedIn Lead Gen Forms, Meta Lead Ads, and other supported lead forms. No manual Excel export should be required.

95. Digital Campaign Data

- Platform
- Campaign ID
- Campaign Name
- Ad Group
- Ad Set
- Ad ID
- Creative
- Spend
- Impressions
- Reach
- Clicks
- CTR
- CPC
- CPM
- Leads
- Qualified Leads
- Viewings
- Proposals
- Reservations
- Contracts
- Contract Value
- Revenue

96. Marketing Attribution

- First Touch
- Last Touch
- Multi-Touch where required
- UTM Source
- UTM Medium
- UTM Campaign
- UTM Content
- UTM Term
- Click ID

- Campaign ID
- Ad ID
- Landing Page
- Original Source
- Latest Source

97. Marketing Dashboard

- Marketing Spend
- Impressions
- Reach
- Clicks
- Leads
- Qualified Leads
- Viewings
- Proposals
- Reservations
- Contracts
- Contract Value
- Cost per Lead
- Cost per Qualified Lead
- Cost per Viewing
- Cost per Contract
- ROAS
- Marketing ROI

98. Platform Comparison

The system shall compare Snapchat, TikTok, LinkedIn, Instagram, Facebook, and Google based on Spend, Leads, CPL, Qualification Rate, Viewing Conversion, Contract Conversion, Contract Value, Revenue, and ROAS.

99. Property-Level Marketing Analysis

- Marketing Spend
- Leads
- Qualified Leads
- Viewings
- Contracts
- Cost per Lead
- Cost per Lease
- Contract Value
- Best Performing Platform
- Best Performing Campaign

100. Campaign-to-Asset Mapping

- Portfolio
- City
- District
- Property
- Building

- Unit Type
- Specific Unit where required

101. Conversion Feedback

Where supported by external platforms, the system should be able to send conversion events back to advertising platforms, including Lead, Qualified Lead, Viewing, Reservation, and Contract Signed.

102. Audience Integration

Subject to applicable privacy requirements and technical capabilities, the system may support audience creation for Website Visitors, Property Page Visitors, Leads, Qualified Leads, Existing Tenants, and Lost Leads.

103. Marketing Consent and Privacy

- Marketing Consent
- Communication Consent
- Opt-Out
- Cookie Consent where applicable
- Consent History
- Privacy Preferences

104. CRM and Workflow Integrations

- monday.com
- Zoho CRM
- Zoho Books
- Zoho Analytics
- Zoho Campaigns
- Zoho Desk
- Other external CRM systems

105. monday.com Integration

- Lead Creation
- Task Creation
- Status Synchronization
- Workflow Synchronization
- Property Activity Synchronization

A System of Record must be defined for each entity to avoid duplicate ownership of the same data.

106. Zoho Integration

Integration capabilities may include CRM, Accounting, Analytics, Marketing, and Customer Service depending on the organization's selected Zoho products.

107. No-Code and Low-Code Integration

- Make
- Zapier
- n8n

108. Integration Hub

- Integration Name
- Connection Status
- Account
- Last Sync
- Last Successful Sync
- Failed Transactions
- Error Message
- Token Status
- Retry
- Reconnect

109. System of Record

For every external integration, a data ownership model shall be defined. Example: Properties and Units - Property Platform Master; Leads - Property Platform Master; Financial Accounting - ERP Master.

110. API Coverage

- /properties
- /buildings
- /units
- /availability
- /pricing
- /customers
- /leads
- /viewings
- /proposals
- /reservations
- /contracts
- /payments
- /collections
- /maintenance
- /documents
- /reports

111. Webhooks

- property.created
- property.updated
- unit.available
- unit.updated
- unit.reserved
- unit.leased
- price.changed
- lead.created
- viewing.created
- proposal.sent
- reservation.created
- contract.signed

- payment.received
- payment.overdue
- maintenance.created
- contract.expiring

112. Executive Report Generator

The system shall contain an automated Executive Report Generator. Users shall select Portfolio, City, District, Property, Reporting Period, and Report Type, then select Generate Executive Report.

113. Executive Report Types

- Portfolio Report
- City Report
- District Report
- Property Report
- Leasing Report
- Collection Report
- Maintenance Report
- Asset Performance Report
- Marketing Report
- Monthly Management Report
- Quarterly Business Review
- Annual Portfolio Report

114. Executive Report Structure

37. Cover Page
38. Reporting Period
39. Executive Summary
40. Portfolio KPIs
41. Portfolio Value
42. Revenue
43. NOI
44. Occupancy
45. Vacancy
46. Collections
47. Overdue Analysis
48. Leasing Activity
49. Lease Expiry
50. Renewals
51. Maintenance
52. Property Ranking
53. City Comparison
54. Key Risks
55. Management Actions

115. Executive Report Formats

- PDF
- Excel

- PowerPoint

Reports must be suitable for senior management and board-level presentation.

116. Branded Reporting

- Company Logo
- Corporate Colors
- Fonts
- Cover Template
- Footer
- Confidentiality Statement
- Report Layout
- Management Report Template

117. Automated Reporting Schedule

Reports shall support scheduled delivery, such as Weekly Leasing Report, Monthly Portfolio Report, and Quarterly Business Review.

118. Report Snapshot

Every generated management report shall retain a snapshot of the reporting data used at the time of generation. Historical reports shall not change when current operational data changes.

119. Executive Commentary

Reports shall allow management commentary to explain key movements, exceptions, and decisions.

120. KPI Dictionary

A formal KPI Dictionary shall be developed before system acceptance. Each KPI shall define KPI Name, Business Definition, Formula, Data Source, Reporting Frequency, and Responsible Department.

- Occupancy Rate
- Collection Rate
- NOI
- Vacancy Rate
- Vacancy Loss
- Rent per Square Meter
- Renewal Rate
- WALE
- Yield

121. Leasing KPIs

- New Leads
- Qualified Leads
- Lead-to-Viewing Conversion
- Viewing-to-Proposal Conversion
- Proposal-to-Lease Conversion
- Lead-to-Lease Conversion
- Average Response Time

- Average Days to Lease
- Average Rent per Square Meter
- Asking versus Achieved Rent
- Average Discount
- Days on Market
- Lost Lead Reasons

122. Collection KPIs

- Amount Due
- Amount Collected
- Collection Rate
- Outstanding
- Overdue
- Aging
- Average Days Outstanding
- Property Collection Performance
- Tenant Collection Performance

123. Asset KPIs

- Portfolio Market Value
- Book Value
- Annual Rental Value
- NOI
- Gross Yield
- Net Yield
- Cap Rate
- Occupancy
- Vacancy
- Maintenance Cost
- OPEX
- Revenue Growth

124. Marketing KPIs

- Marketing Spend
- Leads
- Qualified Leads
- Cost per Lead
- Cost per Qualified Lead
- Cost per Viewing
- Cost per Contract
- Contract Value
- ROAS
- Marketing ROI
- Channel Conversion Rate

125. User Roles

- Super Admin

- Executive Management
- Asset Management
- Property Director
- Property Manager
- Leasing Director
- Leasing Manager
- Leasing Agent
- Finance
- Collection Officer
- Maintenance
- Facility Management
- Legal
- Marketing
- Customer Service
- Read Only

126. Data-Level Permissions

Permissions shall apply not only to screens but also to data. Example: City Manager - Assigned City Only; Property Manager - Assigned Properties Only; Finance - Financial Data; Marketing - Marketing Content; Executive - Portfolio-Wide Read Access.

127. Approval Workflow Engine

- Pricing
- Discounts
- Incentives
- Free Rent
- Deposits
- Fit-Out Contributions
- Special Contract Terms
- Commission
- Waivers
- Maintenance Spend

128. Workflow Builder

Trigger → Condition → Action → Approval → Notification → Escalation

Authorized users shall configure workflows without source-code changes.

129. Tasks and Activities

- Task
- Owner
- Due Date
- Priority
- Reminder
- Status
- Linked Record

130. Notification Center

- New Lead
- Uncontacted Lead
- Follow-Up Due
- Viewing Today
- Approval Required
- Reservation Expiry
- Contract Expiry
- Payment Due
- Payment Overdue
- Document Expiry
- Maintenance SLA Breach
- Vacant Unit
- Renewal Required

131. Global Search

- Property
- Building
- Unit
- Customer
- Tenant
- Mobile Number
- Email
- Contract
- Invoice
- Payment
- Work Order
- Ownership Document
- Commercial Registration
- Identification

132. Advanced Filters

The system shall allow advanced multi-criteria filters and search logic across properties, units, leases, collections, and customers.

133. Saved Views

- My Leads
- Vacant Offices
- Overdue Tenants
- Expiring Contracts
- High Maintenance Units
- Pending Approvals

134. Data Export

- Excel
- CSV

- PDF

Exports shall remain subject to user permissions.

135. Bulk Data Import

- Data Validation
- Duplicate Detection
- Import Preview
- Error Report
- Import History
- Rollback where technically feasible

136. Audit Trail

- User
- Date
- Time
- Action
- Record
- Previous Value
- New Value
- Reason
- Approval Reference
- IP Address
- Device where applicable

Audit logs shall not be editable by normal users.

137. Document Management

- Property Documents
- Ownership Documents
- Tenant Documents
- Contracts
- Invoices
- Payments
- Maintenance
- Valuation
- Insurance
- Licenses
- Permits

138. Document Expiry Alerts

- Insurance
- Commercial Registration
- Licenses
- Contracts
- Maintenance Agreements
- Warranty
- Tenant Documents

139. BI Architecture

- Power BI
- Tableau
- Looker
- Zoho Analytics
- Other BI Platforms

140. Data Warehouse Readiness

The system architecture shall support future implementation of a separate data warehouse or analytics layer. Heavy management reporting should be capable of operating without negatively affecting core transactional performance.

141. Historical Snapshots

- Occupancy
- Vacancy
- Rent Roll
- Collections
- Asset Values
- Portfolio Values
- NOI

142. AI Readiness

- AI Leasing Assistant
- Lead Scoring
- Unit Recommendation
- Vacancy Prediction
- Rent Recommendation
- Renewal Risk Prediction
- Predictive Maintenance
- Executive Summary Generation
- Natural-Language Search
- Portfolio Performance Analysis

143. Natural-Language Analytics

Future capability example: “Show all Riyadh properties with occupancy below 90% and maintenance costs more than 15% above budget.” The system should be architected to support this capability.

144. Mobile and Responsive Design

- Desktop
- Laptop
- Tablet
- Mobile

Critical business functions shall remain usable across devices.

145. Language Support

- English LTR
- Arabic RTL

Users shall be able to select their preferred interface language.

146. UX Principles

The interface shall follow Maximum Information - Minimum Clicks.

- Overview
- Units
- Leases
- Tenants
- Collections
- Maintenance
- Financials
- Documents
- Dashboard

147. Dashboard UX Principle

Overview → Exception → Drill Down → Action

The dashboard must allow users to identify issues and immediately navigate to the records requiring action.

148. Security Requirements

- HTTPS
- Encryption in Transit
- Encryption at Rest
- MFA
- Role-Based Access Control
- Secure Session Management
- Strong Password Policy
- API Authentication
- Rate Limiting
- Login Monitoring
- Failed Login Detection
- Audit Logs
- Backup Encryption

149. Data Privacy

Sensitive information shall be protected, including Identification, Mobile Numbers, Financial Information, Bank Information, Contracts, Tenant Documents, and Corporate Information. Access shall follow least-privilege principles.

150. Backup and Disaster Recovery

- Daily Backups
- Incremental Backups
- Point-in-Time Recovery

- Offsite Backups
- Disaster Recovery Procedures

The supplier shall define RPO and RTO.

151. Performance Requirements

The platform shall be architected to scale to at least 100,000+ Units, 1,000,000+ Leads, and Millions of Transactions without a major architectural redesign.

152. Response-Time Targets

Standard Pages	< 2 Seconds
Search	< 2 Seconds
Standard API Calls	< 1 Second where technically practical
Heavy Reports	Processed through optimized reporting infrastructure

153. Core Business Rules

BR-001 A unit cannot be published if its status is not eligible for publication.

BR-002 A unit cannot have conflicting active reservations.

BR-003 A unit cannot have overlapping active lease contracts.

BR-004 Pricing below permitted limits requires approval.

BR-005 All pricing changes must be retained in price history.

BR-006 A lost lead cannot be closed without a loss reason.

BR-007 Customer duplicate detection must occur before creating a new customer.

BR-008 A website inquiry must automatically create or update a lead.

BR-009 Unit status changes must automatically update the website.

BR-010 A signed contract must automatically update unit leasing status.

BR-011 An expired reservation shall release the unit according to business rules.

BR-012 Signed contracts must not be permanently deleted.

BR-013 Financial transactions must not be permanently deleted.

BR-014 Maintenance costs must roll up from unit to property and portfolio.

BR-015 Collections must roll up from payment to unit, property, city, and portfolio.

BR-016 Dashboards and management reports shall use the approved master data source.

BR-017 All sensitive business changes must be recorded in the audit trail.

BR-018 External integration failures must be logged and traceable.

154. Acceptance Scenario - Leasing

Create Unit → Set Pricing → Publish Unit → Website → Lead Created → Agent Assigned → Viewing → Proposal → Approval → Reservation → Contract → Signed → Leased

The entire lifecycle must operate without duplicate manual data entry.

155. Acceptance Scenario - Collections

Payment → Unit Collection → Property Collection → District Collection → City Collection → Portfolio Collection → Executive Dashboard

156. Acceptance Scenario - Maintenance

Maintenance Invoice → Maintenance Cost → Property OPEX → Property NOI → Budget vs Actual → Portfolio Maintenance Dashboard

157. Acceptance Scenario - Website

When Unit Status changes from Available to Reserved, the website and all supported connected listing channels must update automatically according to publication rules.

158. Acceptance Scenario - Executive Reporting

The user selects Portfolio, Reporting Period, and Report Type, then selects Generate Executive Report. The system shall produce a management-ready report containing KPIs, Charts, Collections, Occupancy, Revenue, Maintenance, NOI, Property Performance, Key Risks, and Management Actions without manual spreadsheet preparation.

159. Phase 1 - Core Platform

- Property Master
- Building Master
- Unit Master
- Ejar-Aligned Data Fields
- Availability
- Pricing
- Price History
- Leasing CRM
- Customer 360
- Lead Management
- Viewing
- Proposal
- Approval
- Reservation
- Contracts
- Payment Schedule
- Collections
- Maintenance
- Property Dashboard
- Executive Portfolio Dashboard
- Website Integration
- Marketing Attribution
- Users and Permissions
- Audit Trail
- API Layer
- Reporting

160. Phase 2 - Enterprise Integrations

- ERP Integration
- Accounting Integration
- Ejar Integration where technically available
- Payment Gateway
- Advanced Collections
- Tenant Portal
- Digital Signature
- Asset Register
- Advanced Maintenance
- Valuation Module
- Budgeting
- BI Integration
- Marketing Platform APIs
- Zoho Integration
- monday.com Integration

161. Phase 3 - Advanced Intelligence

- AI Leasing Assistant
- Lead Scoring
- Automated Unit Matching
- Rent Recommendations
- Demand Forecast
- Vacancy Forecast
- Renewal Prediction
- Predictive Maintenance
- AI Executive Reporting
- Natural-Language Analytics
- Portfolio Scenario Analysis

162. Required Documentation Before Development

56. Business Requirements Document
57. Functional Requirements Specification
58. Solution Architecture
59. Database ERD
60. Data Dictionary
61. KPI Dictionary
62. User Role and Permission Matrix
63. Workflow Diagrams
64. Integration Architecture
65. API Specification
66. Wireframes
67. UI/UX Prototype
68. Dashboard Mockups
69. Reporting Catalogue
70. Test Strategy

163. Required Technical Deliverables

- Complete Source Code
- Source Code Repository
- Database
- Database Schema
- ERD
- API Documentation
- Architecture Documentation
- Deployment Documentation
- Integration Documentation
- Configuration Documentation
- Administrator Manual
- User Manual
- Test Cases
- UAT Results
- Performance Testing Results
- Security Testing Results
- Backup Procedures
- Disaster Recovery Procedures
- Credentials
- Environment Documentation

164. Intellectual Property

Subject to the final commercial agreement, the organization shall retain ownership and access rights to Source Code, Database, Data Model, Business Logic, APIs, Designs, Documentation, Reports, Configurations, and Integration Specifications. The system shall not depend on undocumented proprietary knowledge held by a single developer or individual.

165. Final Management Outcome

The system shall enable senior management to answer, within seconds:

- What is the total portfolio value?
- What is the total annual rental value?
- What is the current contracted revenue?
- How much has been collected?
- How much remains outstanding?
- How much is overdue?
- What is the collection rate?
- What is the occupancy rate?
- What is the vacancy rate?
- Which units are vacant?
- How long have they been vacant?
- What is the estimated vacancy loss?
- Which properties perform best?
- Which properties underperform?
- What is the maintenance cost?
- What is the OPEX?
- What is the NOI?

- Which contracts are expiring?
- Which leases require renewal?
- Which tenants have overdue balances?
- What is the portfolio value by city?
- What is the portfolio value by district?
- Which marketing platforms generate the best leases?
- What is the actual marketing ROI?
- Which properties require immediate management attention?

From the same interface, management must be able to drill down:

Portfolio → City → District → Property → Building → Unit → Contract / Payment / Maintenance

166. Target State

Enterprise Real Estate Operating System

**Register Asset → Manage Property → Manage Units → Market → Capture Leads → Lease → Approve
→ Reserve → Contract → Collect → Operate → Maintain → Measure Performance → Value Asset →
Renew / Re-Lease → Report to Management**

All property, leasing, financial, operational, marketing, and performance information shall be maintained in a centralized, secure, integrated, and scalable platform.
